Why go to Beverly Hills for the BEST and most beneficial Anti-Aging Skin Treatment...or pay the price?

“STATE OF THE ART LED LIGHT THERAPY”

What is LED light therapy?
Light therapy is the application of light energy to the skin for restorative benefits. It is a natural photo biochemical reaction similar to the process of plant photosynthesis.

Over the past 40 years NASA's space program has proven that Del Sol LED Light Therapy (near-infrared) produces the following results:

- Reduces fine lines and wrinkles, smoothes skin texture, firms, decreases incidence of Acne.
- The energy delivered by the Light Emitting Diodes (LEDs) enhances cellular metabolism and accelerates the repair and replenishment of damaged skin cells.
- Stimulates the production of collagen -the foundation of a healthy and smooth skin.
- Treatments are non-abrasive, non-invasive, non electrical, relaxing and painless with absolutely no downtime. It is safe for all skin types and all ages. Clients do not need to miss work or social functions after the treatment. Expert friendly technicians to serve you.
